		E 11 1 (1)
Lesson plan Number	Class and date of implementation	Feedback (time, presentation
		of lesson plans, key outcomes)
6rd	Class 6. A, B,	2 school hours, power point
	week: 2022. 5. 2020	presentation, list

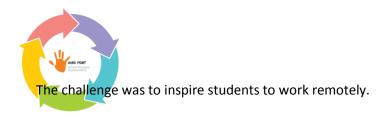

5. What changes you would recommend?

The topic was very suitable for distant learning, as they studied circularity in their own backyards. I have no complaints.

6. What was interesting in the lesson plans?

We conducted the lesson remotely. The task allowed the inclusion of their family. With this, they also considered how many different raw materials the whole family consumes.

7. What did you find challenging in the lesson plans?

- 8. How did your project impact :
- a) Students
- b) Circularity in the school
- c) Other stakeholders

9. What did you learn?

We need to be aware that our consumption affects resources. Most of the items we no longer need land in a landfill. Greater emphasis could also be placed on schools on the use and consumption of resources that can be recycled or reused.

PROJEKT E-SPACE 6. UČNA URA

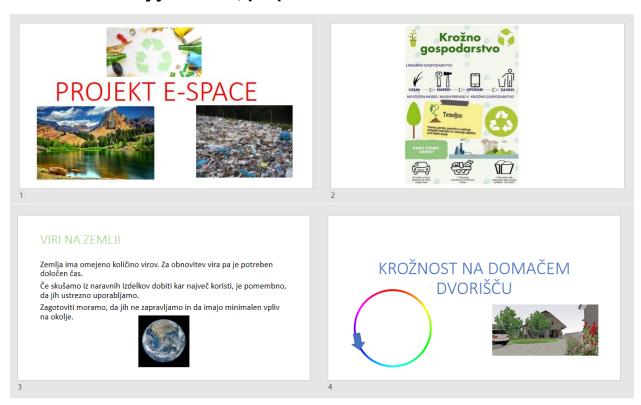

Z učenci 6. razreda smo v okviru projekta E-space izvedli še 6. učno uro pri pouku gospodinjstva.

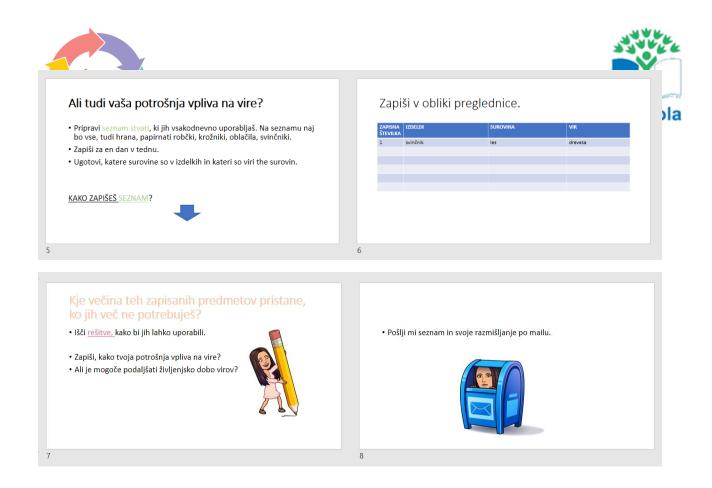

Pripravila sem Power Point predstavitev z navodili za učence.

Ogledali so si tudi izredno zanimivo in prosto dostopno oddajo iz francoske serije Nadnarava, ki v ospredje postavlja biomimikrijo in trajnostne rešitve.

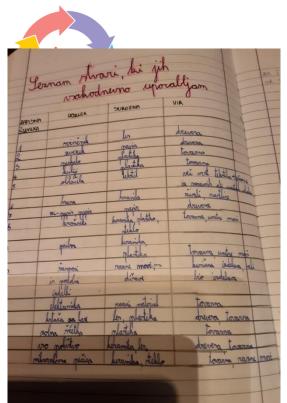

Lepljivost: https://www.rtvslo.si/tv/novosti/nadnarava-lepljivost/520318

Teh oddaj je sicer 5, pri pouku smo žal imeli čas le za eno.

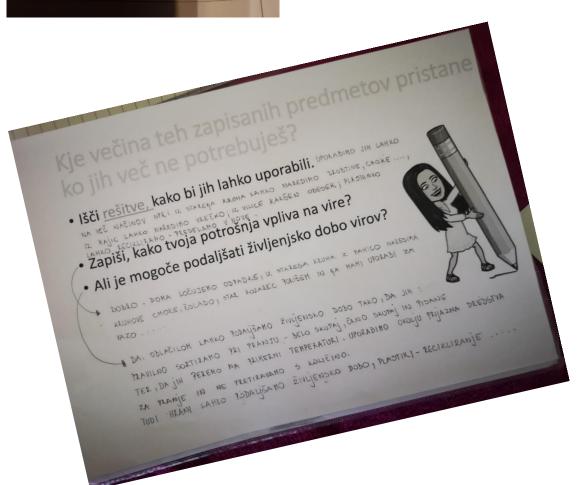

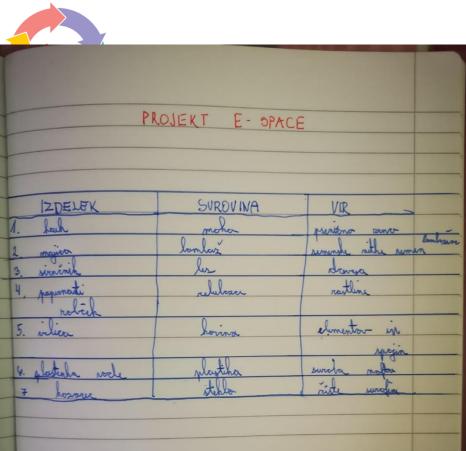

Nekaj seznamov in razmišljanja učencev:

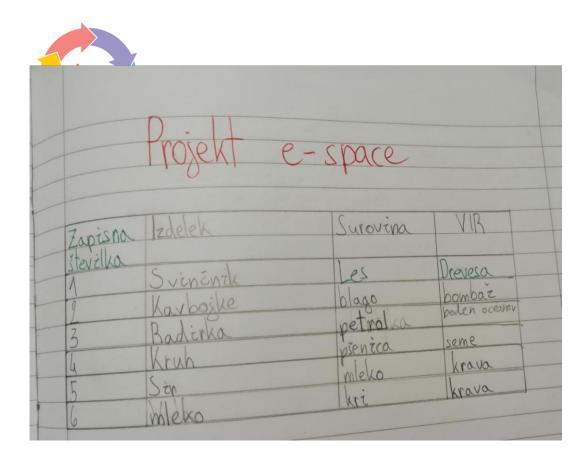

Tivienho dolo indelhou bi lahka podaljali. No indelek mi uti uporaben, ga lahko medelamo.
